Product description

XA- 66 Wheeled 6x6 personnel & equipment carrier capable of transporting up to 6 passengers or a maximum of 1,400 lbs. The unit is equipped with a 44 HP diesel engine and has a maximum land speed of 15 mph. This unit is fully amphibious and is propelled in the water by twin propellers to maximum water speed of 4-5 mph (depending on load and conditions).

XT- 66 Tracked 6x6 personnel & equipment carrier capable of transporting up to 6 passengers or a maximum of 1,600 lbs. The unit is equipped with a 44 HP diesel engine and has a maximum land speed of 15 mph. This unit is fully amphibious and is propelled in the water by twin propellers to maximum water speed of 3- 4 mph (depending on load and conditions). The tracked unit is ideal for swamps and bogs requiring lower ground pressure as well as sensitive environmental areas.

D-2488 Tracked 8x8 personnel & equipment carrier capable of transporting up to 6 passengers or a maximum of 2,000 lbs. The unit is equipped with a 60 HP diesel engine and has a maximum land speed of 15 mph. This unit is fully amphibious and is propelled in the water by twin propellers to maximum water speed of 3-4 mph (depending on load and conditions). The tracked unit is ideal for the worst swamps and bogs. This is our lowest ground pressure unit as is capable of traversing the most severe conditions.

D-2488B Tracked 8x8 personnel & equipment carrier capable of transporting up to 7 passengers or a maximum of 2,000 lbs. The unit is equipped with a 60 HP diesel engine and has a maximum land speed of 15 mph. This unit is fully amphibious and is propelled in the water by twin propellers to maximum water speed of 3-4 mph (depending on load and conditions). The tracked unit is ideal for the worst swamps and bogs. This is our lowest ground pressure unit and is capable of traversing the most severe conditions. The D-2488B is equipped with a bed to allow more cargo carrying capabilities or additional personnel.

'Raft"/ROP Box The "Raft" is a personnel or equipment hauler capable of carrying loads up to 1,800 lbs while providing full floatation. The "ROP BOX" has the same features as the raft but is not equipped with wheels to allow for extreme swamp and bog conditions.

Unit Trailers Specialty designed trailers that allow easy movement from job site to job site and are equipped with strategic hold downs and wheel chocks for increased safety
